DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1 150, drawn to a microfluidic device, classified in class 422, subclass
 100.
- II. Claims 151 164, drawn to a liquid volume injection system, classified in class
 422, subclass 100.
- III. Claims 165 178, drawn to an electrokinetically-operated microfluidic system, classified in class 422, subclass 100.
- IV. Claims 179 181, drawn to a microfluidic device, classified in class 422, subclass100.
- V. Claims 182 185, drawn to a microfluidic device, classified in class 422, subclass
 100.
- VI. Claims 186 189, drawn to a microfluidic device, classified in class 422, subclass 100.
- VII. Claims 190 196, drawn to a microfluidic device, classified in class 422, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

Inventions I – VII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP \S 806.04, MPEP \S 808.01). In the instant case, the different inventions have different modes of operation and function. For example, the invention

Application/Control Number: 10/028,852

Art Unit: 1743

of group II is drawn to a liquid volume injection system, whereas the invention of group IV is drawn to a microfluidic device comprising a filling aperture.

Because these inventions are distinct for the reasons given above and the search required for each of the groups is different, restriction for examination purposes as indicated is proper.

A telephone call was made to Anthony A. Laurentano on 6/23/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Sines whose telephone number is (571) 272-1263. The examiner can normally be reached on Monday - Friday (11:30 AM - 8 PM EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill A. Warden can be reached on (571) 272-1267. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Art Unit: 1743

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
